General

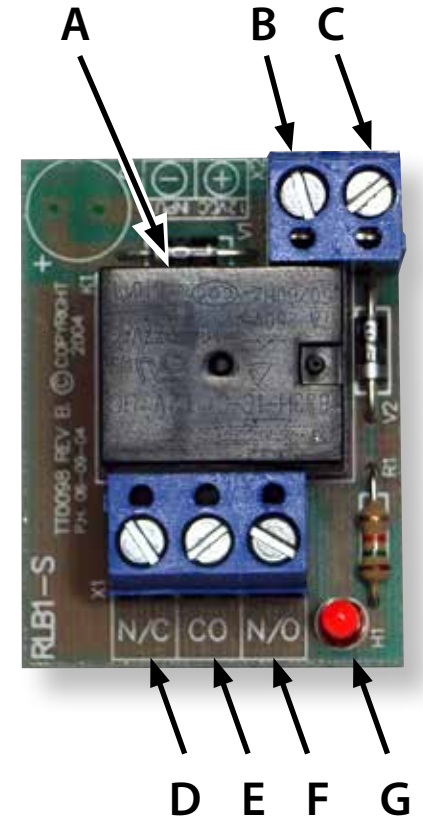

RLB1-S is a 24Vdc "non-buffered" relay with a single pole, double throw output (SPDT).

RLB1-S may be used to drive devices drawing up to 6A @ 30Vdc.

Connecting a 24Vdc source to the input will activate the relay and illuminated LED H1.

This relay is also available in a 12Vdc configuration
- Tactical Part No: RLB1-S-12VDC

Please visit www.tacpower.com.au for additional models.
