

RLB1-DPDT

The RLB1-DPDT is a 12VDC dual buffered input PCB mounted relay.
Connect 12VDC to the nominated terminals observing correct polarity.
The relay can be triggered on either + or - trigger input terminal. Applying a positive voltage between 5V to 15V or 0V to the respective terminals will activate the relay and will deactivate upon removal of the trigger voltage. Triggered input will be indicated by the on-board red LED.
The relay is fitted with two x DPDT relay contacts NC,C,NO which have a contact rating of 1A at 30VDC.
Each set of contacts can be configured via jumper header to be voltage free, positive or 0 Volts on the common terminal.

Specifications :

(In the interests of product improvement, Tactical reserves the right to change specifications without notice)

Model #	RLB1-DPDT
Input Voltage	11DC to 15VDC
Current Draw	47mA when relay is activated
Output Channels	2
Contact rating	1A at 30VDC per set of contacts
Status Indication	Red LED illuminated when relay is triggered
Weight	120g approx
Dimensions	32 L x 42 w x 19 H
Working Temperature	0 - 50 ⁰ C
Mounting	3M adhesive backed stand-offs
Warranty	3 Years
