

RLB1-SPDT

The RLB1-SPDT is a 12VDC dual buffered input PCB mounted relay. Input voltage 12VDC to the nominated terminals observing correct polarity. The relay can be triggered on either + or - trigger input terminal. Applying a positive voltage between 5V to 15V or 0V to the respective terminals will activate the relay and will deactivate upon removal of the trigger voltage. Triggered input will be indicated by the on-board red LED. The relay is fitted with SPDT relay contacts NC,C,NO which have a contact rating of 6A at 30VDC.

Specifications :

(In the interests of product improvement, Tactical reserves the right to change specifications without notice)

Model #	RLB1-SPDT
Input Voltage	Jumper selectable 11DC to 15VDC
Current Draw	Input dependant 47mA at 12V when relay is activated
Output Channels	1
Contact rating	6A at 30VDC contacts
Status Indication	Red LED illuminated when relay is triggered
Weight	120g approx
Dimensions	32 L x 47 w x 19 H
Working Temperature	0 - 50° C
Mounting	3M adhesive backed stand-offs
Warranty	3 Years
